

Intro

Due to requirements in family I created a simple web for left time calculation.

Application

ideas

Set dates in the future (or past) and let the application calculate the days/hours/minutes left to that.

design goals

- add schedule to calender
- add schedule to app
- calculate all added dates
- remove schedule from app
- show information on schedule
- add a tag/info to a schedule
- multi language (EN/DE at the moment)
- Cloud integration - cloud at countdown.siningsoft.de
- Cloud integration - private cloud
- some configuration options

Implementation

function	implemented
add dates	
calculate dates	
remove dates	
add date to organizer	
cloud integration	
cloud integration with web access (UID)
